

DECLARATION

I hereby declare that this submission is my own work towards the Master of Philosophy in Economics and that, to the best of my knowledge; it has neither been partially nor wholly submitted to any other institution for the award of any degree. It contains no material previously published by another person except where due acknowledgement has been made in the text.

DEDICATION

I dedicate this thesis to my loving wife, Belinda Larteley Lartey, my parents, Mr. and Mrs. Etuaful and my mother – in – law, Chief Inspector Grace Gyamfi Sarkodie whose invaluable time I stole to accomplish this task.

ACKNOWLEDGEMENT

A study of this kind could not have been successful without the help of God. I therefore, wish to express my sincere gratitude to the Most High God without whom I would not have been what I am today.

I am greatly indebted to my supervisor, Dr. (Sr) Eugenia Amporfu, Department of Economics, Kwame Nkrumah University of Science and Technology, Kumasi, for her immense contributions, suggestions, guidance, support and encouragement that have made this study become a living reality

My next thanks go to the District Health Director (Mr. Isaac Odame Awuku) and the staff of all the Health facilities in Adansi North district for responding with love towards the success of this study.

Finally, I say a heartfelt thanks to my loving wife (Mrs. Belinda Larteley Etuaful), my mother (Mrs. Augustina Kyere Adom Etuaful), my father (Mr. Benjamin Etuaful), Mr. Kwabena Asare Tuffour (Headmaster of Akumadan SHS) and Mr. Joseph Obi (Headmaster of Bodwesango SHS) for their endless love and for believing in me. I wouldn't have come this far without their push and support especially my wife.

ABSTRACT

Analyses of health insurance markets over the past several decades have recognized that insurance motivate beneficiaries to consume more health care than they would if they were uninsured. Even though advocates for universal coverage and improved access to care may view this increase in utilization as positive. However, standard economic analysis recommends that this additional consumption could diminish economic welfare.

This study adopted Nyman definition of moral hazard (substitution effect) to establish that moral hazard base on the substitution effect is inefficient in malaria treatment; using pure price (substitution) effect of people consuming more health services when its price is low but not the income effect of people consuming more health services because of insurance.

The study administered questionnaires to gather information related to the subject matter and purposive sampling technique was used to select insured malaria out-patients at the study area. Specifically, the study used logit regression as the empirical method of estimation. The study revealed that, greater percentage of insured malaria out-patients engage in moral hazard at the study area.

It is therefore recommended that, NHIA should strengthen their education programmes and introduce incentives that will discourage multiple usages of services and reward mechanisms for non-frequent visits to health facilities for a specified time period.

TABLE OF CONTENTS

CONTENT	PAGE
DECLARATION	i
DEDICATION	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	viii
LIST OF A FIGURES	ix
LIST OF ABBREVIATIONS	x
CHAPTER ONE: INTRODUCTION	1
1.1 Background to the Study	1
1.2 Problem Statement	5
1.3 Objectives of Study	6
1.4 Research Questions	7
1.5 Justification of Study	7
1.6 Scope of Study	8
1.7 Organisation of the Study	8
CHAPTER TWO: LITERATURE REVIEW	10
2.0 Introduction	10
2.1 Health Service in Ghana	10
2.2 National Health Insurance Scheme in Ghana	14
2.3 Theoretical Review on Moral Hazard and Health Care Utilization	21

2.4 Empirical Review on Moral Hazard and Health Care Utilization	30
2.4.1 Moral Hazard and Health Care Utilization in Developed Nations	31
2.4.2 Moral Hazard and Health Care Utilization in Developing Nations	33
2.4.3 Moral Hazard and Health Care Utilization in Africa	34
2.4.4 Moral Hazard and Health Care Utilization in Ghana	35
2.5 Demographic and Socio – economic factors that influence moral hazard	36
 CHAPTER THREE: METHODOLOGY	38
3.0 Introduction	38
3.1 Background to the Study Area	38
3.2 Study Design	40
3.3 Population and Sampling Procedures	40
3.4 Instrumentation	41
3.4.1 Pre – test of Research Instrument	41
3.5 Data Collection	42
3.6 Data Organization	42
3.6.1 Data Coding	43
3.6.2 Data Entry and Coding	43
3.7 Ethical Issues	43
3.8 Data Analysis	44
3.8.1 Qualitative Analysis	44
3.8.2 Quantitative Analysis	44
3.8.2.1 Theoretical Model	45
3.8.2.2 Determination of Moral Hazard	45
3.8.2.3 Empirical Model	46

3.9 Operational Definition of variables	47
CHAPTER FOUR: DATA ANALYSIS AND DISCUSSION OF RESULTS	52
4.0 Introduction	52
4.1 Demographic and Socio-economic characteristics of Insured Out-patient.....	52
4.2 Existence of Moral hazard	55
4.3 Demographic and Socio-economic factors that affect Moral hazard	55
4.3.1 Analysis of Marginal Effect from Empirical results	62
4.4 Test of Multicollinearity in the Empirical model	66
CHAPTER FIVE: SUMMARY OF FINDINGS, CONCLUSION AND RECOMMENDATION	68
5.0 Introduction	68
5.1 Summary of Major Findings	68
5.2 Conclusions	70
5.3 Recommendations	70
REFERENCES.....	72
APPENDICES	81
1: Questionnaire	81
2: Summary statistics of Variable in the Empirical model	83
3: Logit Estimates using 500 Observations	84
4: Marginal Effect of variables in empirical model	85
5: Multicollinearity Test of explanatory variables	86

LIST OF TABLES

Table	Page
2.1 NHIS active membership by region	18
2.2 Active NHIS subscribers by category	19
3.1 Expected signs of Regressors	47
4.1 Demographic and Socio-economic characteristics of Insured Out-patient	53
4.2 Logit estimate results in the empirical model	56
4.3 Marginal effect of explanatory variables in the empirical model	63
4.4 Test of multicollinearity of explanatory variables in empirical model	67

LIST OF FIGURES
